

Andropogon hallii

Sand Bluestem

Plant type:	Perennial
Season of Interest:	June - Dec
Height: 1-7'	Spread: up to 15'
Water needs:	Low
Native Region:	CO, AZ, KS, NE, NM, OK, TX, UT, WY
Elevation:	to 6,500'
Important to know:	Rhizomatously spreads-may overwhelm small gardens. More drought tolerant than Big Bluestem

Maintenance:	Average (control rhizomatous spread)
Characteristics:	Warm season bunch grass.
Garden uses:	Height, Color, Screening
Habitat:	Sandhills, dunes of sand, sage prairie

Ease of Propagation: Medium

Propagation: It is related to Big Bluestem and it has the same fertility issues. It may have few fertile seeds in the inflorescence.

Store seeds dry at 40°. Seeds do not require cold treatment to germinate. They germinate in the fall and overwinter as seedlings. fs.fed.gov/database. No pretreatment. Plant seeds outside fall or spring 1/8 to 1/4" deep. [westernnativeseed.com]
