

Penstemon virens

Front Range Beardtongue

Plant type: Perennial
Season of Interest: Late Spring, Early-Summer
Height: 8" **Spread:** 8-10"
Water needs: Low once established
Native Region: CO, WY
Elevation: to 11,000'
Important to know: They need "elbow room," maximum sun, heat and don't like to be crowded by other plants. They establish quickly and the amount and frequency of watering needs to be reduced after about 8 to 10 weeks to create dry conditions

Maintenance: Low
Characteristics: Fragrant, Showy, Evergreen
Garden uses: container, rock garden
Habitat: Rocky slopes, rock crevices, forest openings

Ease of Propagation: Easy

Propagation: Sow the seeds in cells or in situ 2 months before the last frost date with very light cover. Germination in 2 ½ months.
