

Salvia azurea *var. grandiflora*

Pitcher Sage Blue Sage

Plant type: Perennial
Season of Interest: Summer - Fall
Height: 3-5' **Spread:** 2-4'
Water needs: Low
Native Region: CO, KS, NE, NM, OK, TX, UT
Elevation: 4,000'-5,200'

Maintenance: Low
Characteristics: Sprawls over nearby plants when it begins to bloom-so give it some space!
Garden uses: Beds, Borders
Habitat: Roadsides, fields, grasslands

Ease of Propagation: Easy

Propagation: Unstratified seed can be planted in the fall or stratified seed can be planted in the field in the spring. With no cold, moist stratification approximately 40 percent of the seed will germinate. Pretreatment of cold, moist stratification for 4 to 8 weeks will increase total germination to around 80 percent.

<https://www.nrcs.usda.gov/>

Roots tolerate disturbance during transplanting.
